

# Zehnder Comfosystems at Pronksi Residences

Pronksi 3 apartments are equipped with Passive House certified high heat recovery and low energy consumption mechanical ventilation systems. Each apartment has their own autonomous ventilation unit with anti-bacterial air distribution ducts. The ventilation system can be controlled individually from each apartment.

All apartments are equipped with an enthalpy heat exchanger, which ensures a pleasant indoor climate during the heating period and improves frost protection of the ventilation unit.

## Energy recovery ventilation unit Zehnder CA180

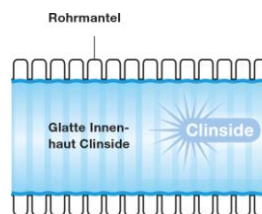

- 84% energy recovery
- SFP: 0.28 W/m<sup>3</sup>/h
- 100% summer bypass
- Integrated pre-heater
- Air flow volume up to 205 m<sup>3</sup>/h at 150 Pa
- Very low noise level
- High energy recovery
- Low electric power consumption

*\* Certified Passive House component*

## Anti-bacterial double wall plastic air distribution system ComfoTube

- higher hygiene of indoor air
- lower maintenance needs
- lower power consumption
- lower noise

## Zehnder Enthalpy heat exchanger

- Humidity recovery during heating period
- Higher comfort and higher frost protection
